

## **Version 5**

Typing in a flash card set that did not exist did not return an error message. (fixed in version 8)

Stop button doesn't end the program. (fixed in version 8)

## **Version 6**

Error message still does not work

Creating an empty file still creates the flash card set still. Opening the set just ends the studying immediately. (fixed in version 8)

The stop button while studying still does not work

## **Version 7**

Flash card set does not exist error message still doesn't work

After removing all the flash cards from a set the application does not close. (fixed in version 8)

## **Version 8**

Stop button works

Removing all images from the set closes the program correctly

Selecting empty folder gives error message "no supported images"
